

I found my answer at BLK...

I am 38 years, and I have problem of health since 2008. So it was very difficult for me to be pregnant.

After many operations, I try 3 IVF in another country, without results. I decide to come in India to try again, but I was aware of difficulties.

One of the 1st things I feel when I came in BLK is the managerial employee, organization, welcome of staff. It's inconceivable in such a different context for a person who wants to do an IVF. It's very important to feel good, to be support by the medical staff. And I feel it.

And when I meet for the 1st time my doctor, I was confident. She takes time to explain me everythings, as like it was my first IVF. In spite of my English level, I understood and above all, I was serene.

With her professionalism, she helps me to realize my dream. She is a young doctor, but a Great lady!

And everyday, I pray God to help me during my pregnancy, and I thanks God, and his performer, Dr Aanchal Agarwal, and all people who is success factor of my pregnancy.
